## making it happen...

Wondering what sort of topics you might find out about? Examples of our research areas include:

- Drug development and management of medicines
- Examination of changes in vision and hearing
- Mobility and safety issues, such as driving simulation
- Diet and exercise
- Sleep studies
- Memory, concentration and problem solving
- Specific illness investigations, for example diabetes.

We may contact you to inform you about any studies you might be interested in participating in. Participation is entirely voluntary and becoming a member of the panel does not put you under any obligation to take part in studies.

### Any questions?

If you would like any further information about registering for our panel, please contact Wendy Overton on 0121 204 4134 or email [lhs\\_archa@aston.ac.uk](mailto:lhs_archa@aston.ac.uk)

Discovering new ways to improve quality of life in older age

## Aston Research Centre for Healthy Ageing (ARCHA)

### we need you...

We are putting together a panel of people aged over 50 who are interested in joining health focus groups and attending talks related to areas of expertise in minds, eyes, the brain, metabolic health and life experience as we age. You will be able to attend all free events or just those that may be of interest to you. We will take every opportunity to make all sessions as interesting as possible by gaining feedback from panel members.

We are looking for enthusiastic volunteers from a variety of backgrounds with different health care needs and experiences.

Our researchers are working on a variety of projects that are relevant to all aspects of the lives of our ageing population

new studies  
at aston give  
great results
