

Photonics Technology Showcase

Tuesday 28th February 2012

You are invited to a technology showcase event to find out more about the innovative Photonics research taking place at Aston University.

The Photonics Research Group at Aston has a world-recognised record of achievements in high-speed optical transmission and processing, in fibre optic components, in nonlinear photonics and in fibre optic sensors for a variety of industrial applications.

Come along to this half day session to learn more about our research, to see our facilities and to discover how partnering with our experts could transform your business. Find out how engaging with the Photonics Research Group at Aston can provide your company with technological, commercial and financial benefits.

Topics covered will include:

- Sensing, telecommunications, nano-photonics, material processing, fibre-optic and laser technologies and other industrial photonics applications
- Funding, collaboration and staff development/teaching links

The event will end with lunch and networking.

Tuesday 28th February 2012
Lakeside Conference Centre,
Aston University, Birmingham B4 7ET

9:30am start with tea and coffee from 9am.
